You may try to get protection, and pretend that it will moment: do, and double your duties. But here are the tables, and I challenge any protectionist on the floor to show that the act of 1842 could have brought us more than taxation, as they do in England. When you carry it to the extent of shutting out the foreign commodity, you must go to internal taxamy friends of the South, who erroneously suppose they would introduce direct taxation with a view to break down protection. "PLYMOUTH ROCK .- This rock was brought to this country in the Mayflower, in the year 1492, by the pilgrims, under directions of Elder Osman Brewster, who afterwards removed to Boston, and became an alderman of that city. Plymouth Rock was put on a wharf, where part of it remains to this day, as people may see, if they will take the trouble to scratch the dirt away. No reason is given for putting the rock up so far from the water, except it was to keep it out of the wet. Dr. N. B. Shurtleff was the first to land on Plymouth Rock, which he did without any trouble, because it wasn't a very big room into which the lady had been conveyed. It was on this rock that Governor Carver first shook hands with Samoset, who said : 'Welcome Englishmen!' It is recorded that when Samoset came up, Governor Carver asked him if he was a real Ingine, or only a member of an ingine company. The rock has long been regarded as a famous place, and a great many things have been written about it. Strangers coming on the coast always climb to the mast-heads with spyglasses to see Plymouth Rock.

"The American eagle, for a great many years, used to come and whet his beak on the rock, but in 1653, Miles Standish, in order to keep it from getting stolen, took all there was of it, and carried it up and put it in front of Pilgrim Hall, where it remains at the present time, invested with great interest and an iron fence.-The fence bears the names of all the Pilgrims in castiron letters that can't be rubbed out. On the other part of the rock, the descendants of the Pilgrims have

child born in Massachusetts, was born on Plymouth with nothing else." Rock, and Miles Standish, when John Alden swindled him out of Priscilla, in 1803, sharpened his sword on Plymouth Rock, is one of the palladiums of our liberty, and if foes invade the shores of Plymouth at low tide, the people will throw this rock in their teeth. It is a precious legacy from the Past to the Present, and from it may be reckoned the Pilgrim's Progress. Boston Post.
